## ZenduMA

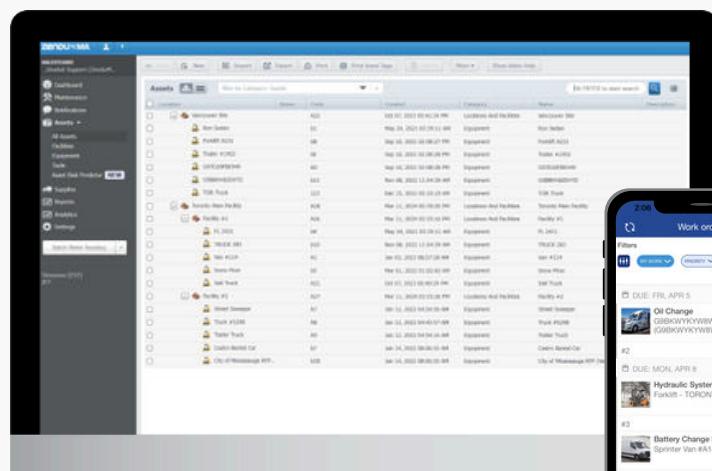

Powerful CMMS Software that fits Businesses of any size

### Good Maintenance is Good Business.

Zendu Maintenance is a powerful, web-based maintenance management system that lets you run your fleet maintenance operations more effectively and efficiently.

Zendu Maintenance can automatically generate work orders when a vehicle fault or scheduled maintenance is triggered. Not only does this streamline your operations, but through proactive maintenance, it also helps you cut costs and minimize downtime. Zendu Maintenance simplifies fleet management like never before.

# FEATURES

## Asset & Vehicle List

Keep a comprehensive list of all your assets and vehicles at your fingertips with Zendu Maintenance. This feature provides an easy-to-navigate database, ensuring you have all the information you need on your fleet's status, maintenance needs, and availability for efficient management and driver-facing footage in High Definition to ensure Driver Safety.

## Technician Mobile App

Empower your technicians with the Zendu Maintenance Mobile App, designed to streamline work order management. Technicians can easily update, manage, and view details for vehicle or asset repairs, all from their mobile device, enhancing productivity and repair turnaround times.

## Fleet ECM Readings

Get precise engine control module (ECM) readings with a simple click on any vehicle or asset in your fleet. Zendu Maintenance provides detailed engine measurements, helping you monitor performance, diagnose issues early, and maintain the health of your fleet efficiently.

# FEATURES

## Maintenance & Work Orders

Streamline your maintenance process with a complete view of all work orders. Zendu Maintenance allows you to oversee and manage maintenance tasks across your fleet from one dashboard, ensuring timely repairs and optimal vehicle performance.

## Parts & Inventory

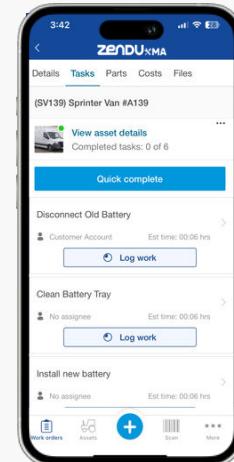

Gain visibility into your parts and supplies, seamlessly tracking them from procurement to usage, all within one intuitive interface. Easily associate parts with work orders, ensuring that your team has the right components at the right time for every job. Monitor parts usage in real-time, empowering you to optimize stock levels and prevent costly delays.

# HOW IT WORKS?

01

Install hardware or seamlessly integrate your compatible telematics devices into Zendu Maintenance for ECM Readings. (Recommended)

02

Arrange assets by facility and location. Establish scheduled maintenance, manage parts, and optimize inventory for enhanced organizational efficiency.

03

Generate or set up reports to periodically assess and analyze maintenance operations.
